

2030 Long Range Transportation Plan Bicycle and Pedestrian Projects

Bicycle and pedestrian elements are vital to creating a walkable community. The main goal driving strategy for the bicycle and pedestrian portion of the 2030 Plan is to fill gaps in the network. Increasing access to transit is another objective, along with improving pedestrian safety. Corridors with high pedestrian traffic and areas with poor accommodations are also a focus of the plan.

Each type of facility (shared use paths, pedestrian, bicycle) was prioritized using different planning criteria and public input. Shared use paths, also known as trails, were prioritized using land use, public input, and connectivity. Pedestrian facilities were prioritized using land use, existing sidewalk coverage, and public input. Bicycle facilities were prioritized using land use, level of service (comfort), public input, and connectivity. All of these prioritized lists are included in this section.

Shared Use Path (Trail) Projects

Priority	Trail	Length (mi)	Construction Cost Est.
1	Little Econ gap	1.0	*
2	Pine Hills-Shingle Creek Connector	1.0	\$199,639
3	Little Econ Extension I (through UCF)	3.1	\$618,880
4	Lake Underhill-Curry Ford Connector	4.5	\$898,374
5	Little Econ Extension II (County line)	3.8	\$758,627
6	Seminole-Wekiva-West Orange Connector	4.1	\$818,519
7	Pine Hills-Seminole-Wekiva Connector	1.5	\$299,458
8	East Toho Canal Path	1.4	\$279,494
9	East Toho Lakefront Extension	3.2	\$638,844

*\$7.7 million based on Orange County's 2007 full project cost estimate, including bridge structure across SR 436
